SUMMARY

Passionate and motivated Computer Science and Engineering graduate with hands-on experience in Linux system administration, scripting, and foundational DevOps practices. Strong understanding of system performance, automation, and cloud infrastructure, with a proactive approach to troubleshooting and continuous learning. Eager to contribute to dynamic DevOps teams by applying practical knowledge of modern development workflows, system monitoring, and deployment processes.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, IAM, VPC, RDS, S3, LB, SG, NACL)
- **Operating Systems:** Windows, Linux (Ubuntu, RHEL)
- **Automation & Scripting:** Bash, Shell Scripting, Cron Jobs
- **Networking:** TCP/IP, DNS, DHCP, Routing & Switching basics
- **Tools & Utilities:** vi, grep, awk, sed, systemctl, journalctl
- **Containers:** Docker (images, containers, volumes, Dockerfile)
- **Version Control:** Git, GitHub
- **Programming:** C, C++, Python (Basic)
- **Web Servers:** Apache2, Nginx, SSH, NFS
- **Troubleshooting:** System performance, logs analysis, network diagnostics
- **Others:** MS Office 365, HTML, CSS

PROFESSIONAL EXPERIENCE

Junior System Administrator – *Interactive Manpower Solutions Pvt. Ltd. - Ahmedabad* | Aug 2025 - Feb 2026

- Provided technical support through ConnectWise Ticketing Portal and remote support tools, ensuring timely resolution of user issues.
- Performed network troubleshooting (LAN/WAN, DNS, DHCP, IP configuration).
- Basic server monitoring to maintain system uptime and performance.
- Assisted users with login, access, and software/hardware issues, improving productivity and reducing downtime.
- Monitored system performance, resource utilization, and alerts to proactively identify and resolve issues.
- Maintained documentation of configurations, incidents, and troubleshooting procedures to streamline future support.
- Collaborated with senior admins on patch management, backup tasks, and system updates.

Linux Administrator – *Upflairs Pvt. Ltd. - Jaipur* | Jan 2025 - July 2025

- Configured and managed Linux servers in a controlled lab environment.
- Performed user account management, permissions setting, and system updates.
- Developed and executed bash scripts for automating system backups, log analysis, and service monitoring.
- Troubleshoot network connectivity issues using tools like ping, netstat, traceroute, and ifconfig.
- Monitored system performance using top, htop, and journalctl, resolving issues proactively.
- Created and managed cron jobs for scheduled system tasks.

Python and Data Management Intern – *Sahana System Limited - Ahmedabad* | Jun 2024 - Aug 2024

- Data Management in ERP - Finance Domain
- Understood the fundamentals of Python programming language, tools, and technologies.
- Collaborated with mentors and team members to implement solutions aligned with project requirements.

CERTIFICATIONS

- Cisco Networking Academy – Introduction to Cybersecurity
- LinkedIn Learning – HTML Essential Training

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

2021 - 2025

Chartered Institute of Technology, Abu Road

Affiliated to Bikaner Technical University, Rajasthan

ADDITIONAL INFORMATION

- **LANGUAGES:** English - Advanced | Hindi - Proficient | Gujarati - Advanced
- **Vice President - CIT Student Council**, led campus-wide student initiatives and events under CIT 360°; collaborated with faculty and peers to enhance student engagement.
- Executed annual fest, college technical workshops, seminars, and management of events.
- Coordinated student welfare initiatives, cultural programs, and inter-departmental events.
- Actively contributed to the planning and successful execution of CIT 360° events.
- Collaborated with faculty and administration to address student concerns and improve campus life.
- **INSPIRE Award:** Innovation in Science Pursuit for Inspired Research, Government of India
- **Scout:** Actively participated in Scouts, a youth organization focused on character development, leadership skills, and community service.

PROJECTS

1. A Multi-Tier Microservices Architecture for User Authentication Using Docker Compose

- **Technologies:** Python (Flask), MySQL, Docker, Docker Compose, phpMyAdmin, AWS EC2, HTML/CSS
- **Description:** Developed and deployed a containerized multi-tier web application that enables user registration and login functionalities using a Flask backend and MySQL database. Managed services using Docker Compose and tested deployment on AWS EC2 (Ubuntu).

Key Features:

- Implemented Login and Registration modules with backend database integration.
- Used Docker Compose to orchestrate multi-container setup (Flask app, MySQL, phpMyAdmin).
- Deployed application on AWS EC2 Ubuntu instance for testing and hosting.
- Designed attractive UI with glassmorphism, dark mode toggle, and FontAwesome icons.
- Integrated phpMyAdmin for database management and verification.

2. Shared Web Hosting using NFS across Linux Environments

- Configured an NFS (Network File System) setup with:
 - Red Hat as NFS Server
 - Ubuntu as NFS Client
- Mounted shared directory to /var/www/html to serve the same website across platforms.
- Enabled cross-platform compatibility and centralized hosting—a key DevOps requirement.

3. Multi-Environment Virtual Hosting Configuration

- Set up virtual hosting on:
 - Ubuntu (Apache, Nginx)
 - Red Hat (httpd)
- Configured custom VirtualHost entries to serve multiple domains from a single machine.
- Implemented environment-specific practices:
 - conf.d/ for Red Hat
 - sites-available/ & sites-enabled/ for Ubuntu
- Demonstrated deep understanding of web server management and configuration.
